Work Experience

Full Stack Developer – OTA Sync · (November 2022 – January 2024)

• Designed and built an Online Travel Agency (OTA) synchronization platform for hotel owners, featuring a Property Management System (PMS) for **managing and displaying reservations and room availability.**

• Engineered **API integrations** and **PHP cURL/Webhook connectors** for data exchange with external systems (**OpenGDS**, **Minimax**, **PriceLabs)**, resulting in automation of **reservation**, **accounting**, and **pricing workflows**.

• Developed custom **data-scraping pipelines** to import hotel and room details directly from **Booking.com** and **Airbnb**, **reducing onboarding time by over 60%**.

• Developed and optimized key accounting modules, including **Expense Management**, **Reporting**, and **Automated Emails**, supporting functionalities like **scheduled report generation** and **recurring entries.**

JavaScript Game Developer – Frontmen Studio · (September 2021 – November 2022)

• Developed and maintained **slot games** such as *Dino Zone*, *Moonlight Wolves*, *Ali Baba*, *Super Stack Cat*, etc.

• Implemented and stabilized **core gameplay features** (*re-spins*, *free spins*, *turbo mode*, *auto-play*, *bonus multipliers*) using **JavaScript (ES6+)**, **Pixi.js**, and **GSAP/TweenMax**.

• Crafted rich **animations** and the **presentation layer** (*reels*, *symbols*, *winning animations*) using **Spine** and GSAP, and implemented advanced mechanics like **Switching Stacks** and **Sticky Wilds re-spins** to elevate **user experience (UX)**.

• Orchestrated **frontend-backend communication** through a custom service layer, accurately mapping game outcomes, bonuses, and win logic for real-time interaction.

Projects

Renegade Urban Winery (portfolio/renegade-urban-winery) · GitHub · Docs · (WooCommerce, PHP, MySQL)
• Custom event ticketing system with secure QR validation, using HMAC protection and seat allocation.

Marko Blog (portfolio/marko-blog) · GitHub · Docs · (ASP.NET Core, React, Redux, MSSQL, Tailwind CSS)
• Full-stack blog platform with CQRS architecture and real-time notifications using SignalR.

Gacanovic Academy (portfolio/gacanovic-academy) · GitHub · Docs · (Laravel, JavaScript, MySQL, AJAX, Stripe)
• E-learning platform with Stripe integration, role-based acces, and full course lifecycle and admin management.

Skoda Rental (portfolio/skoda-rental) · GitHub · Docs · (PHP, JavaScript, MySQL, AJAX, MVC, OOP)
• Car rental system with booking validation, conflict prevention, and admin dashboard for managing vehicles and reservations.

Education

ICT College of Applied Studies, University of Belgrade · Graduated: January 2023
Bachelor of Electrical and Computer Engineering
Study profile: Internet technologies; Module: Web programming;

Skills

Languages and Tools: HTML, CSS, JavaScript, PHP, C#, MySQL, MSSQL, SEO, Git, Postman, REST API
Frameworks and Libraries: React, Laravel, ASP.NET Core, Tailwind CSS
